

PRATHAM KAMBLI

Los Angeles, California - 90007, USA | (623) 800-4861 | prathamkambli8902@gmail.com | www.linkedin.com/in/pratham-kambli

EDUCATION

University of Southern California May 2026
Master of Science for Applied Data Science

University of Mumbai July 2024
Bachelor of Engineering in Artificial Intelligence & Data Science
Honors in Blockchain Technologies

Relevant Courses: Database Management Systems, Statistics and Mathematics, Machine Learning, Big Data (Apache Spark, Hadoop), Natural Language Processing, Data Analysis & Visualization (R, Python), Data Mining, Research Methods, AI Ethics, AI for Finance, Deep Learning

TECHNICAL SKILLS

- Programming languages: C, C++, Java, Python, SQL, R
- ML/AI: Hugging Face, LangChain, RAG, Prompt-Tuning, NLP, NER, PyTorch, TensorFlow
- Databases: PostgreSQL, SQLite, NoSQL, Firebase, Pandas
- Tools & Platforms: SAS Viya, Palantir Foundry, AWS, Microsoft Ecosystem

EXPERIENCE

Junior Data Science Associate | NLP + SOLT Team Sept 2025 - May 2026
TWG AI Los Angeles, CA, US

- Implemented a production finance AI agent using Grok-3, architected as a high-precision alternative to Perplexity's SEC filter, delivering source-grounded, citation-accurate responses backed exclusively by SEC filings
- Scaled the agent's financial knowledge base by scaling historical coverage from 10 to 20 years and feature space from 40 to 200 parameters, allowing granular, question-dependent financial analysis and niche investment insights
- Deployed the finance AI agent with efficient model orchestration, bypassing LLM context window limitations within a \$500 compute budget
- Designed a dynamic pricing optimization model to advise a \$50B+ client on competitive product pricing strategies under a predefined target rate, leveraging market signals and demand elasticity modeling

AI ML Intern, NLP Team June 2025 - Aug 2025
TWG Global Los Angeles, CA, US

- Benchmarked flagship models such as GPT-4, Llama-3, Gemini 2.5, Claude 4.5, and Grok 3, evaluating performance on financial reasoning, accuracy, latency, and judgment-based tasks to identify optimal model-task alignment
- Designed and deployed an AIP Judge using the Claude model, fine-tuned on proprietary financial datasets to evaluate, rank, and score LLM outputs, enabling automated, model-agnostic performance assessment within Palantir Foundry
- Ingested and standardized 10+ years of SEC filings (13F, 10-K, 10-Q), constructing a large-scale financial corpus for fine-tuning and retrieval-augmented generation (RAG) to support an investment-focused AI agent
- Built high-throughput ETL and inference pipelines for batch processing of financial documents, optimizing orchestration and caching to reduce LLM inference latency to sub-5-second SLAs

Technical Intern, Customer Advisory Feb 2024 - May 2024
SAS Analytics Mumbai, MH, India

- Collaborated with a partner bank as part of the Customer Advisory team, resulting in a hybrid program leveraging Python and SAS Viya to identify top 10% of credit-worthy customers
- Applied feature selection methods, demonstrated by processing of 37,000 columns of customer data and achieving a 0.82 F1-Score through techniques such as One-hot encoding, Chi-Square, and ANOVA F-test
- Balanced a 1:10 NOHIT to HIT ratio in a highly imbalanced dataset by augmenting NOHIT tuples, improving model precision by 18% and reducing prediction bias, leading to a more accurate risk assessment

PROJECTS

Speech-to-Database System for Healthcare Applications September 2023 - May 2024

- Engineered a transformer-based deep learning model, incorporating Named-Entity Recognition and RegEx, to transcribe and structure patient-doctor conversations into a tabular format with up to 85% accuracy supporting translation of multiple languages
- Built a backend using Python, Hugging Face models, and PostgreSQL for data storage and enhancing accessibility and analysis
- Integrated PostgreSQL with Gemini 2.5 to catalyze a live conversational interface for querying patient information and other SQL functions
- Authored a research paper and received a government-granted patent – "DocAssist: AI Doctor Assistant" for originality and technical novelty.

ADDITIONAL EXPERIENCE

- Conducted a Data Science seminar as a guest speaker at AVM Group of Schools (Mumbai) in June 2024, guiding and educating students on foundational concepts and real-world applications in field of AI and Machine Learning
- Served as a Residential Assistant, managing floor operations and acting as a primary point of contact for approximately 50 residents bridging the gap between student needs and university administration (2025-2026)
